God's Word - Living Hope for All

Greetings from Japan Bible Society

“Then the LORD will be king over all the earth; everyone will worship him as God and know him by the same name.”
Zechariah 14: 9 (GNT)

Rev. Makoto Watabe
JBS General Secretary

I am grateful that we can send this issue of JBS News International to our

international friends and supporters this year.

Despite the present age where economies and politics of the world constantly change, God has been unchangingly protecting our ministry so that we can continue delivering the Bible into many people's hands.

We need to target our outreach activities in order to best accommodate the needs of this postmodern era. Various attempts and efforts are required for this purpose. By exchanging information and ideas with our international

counterparts, we can inspire each other in order to draw people's attention to God's Word which shines as the light of the world at any time and place.

From 2018, I will be serving as the Moderator of the National Christian Council (NCCJ) in Japan, along with my service here at JBS. It is my prayer that the name of the Lord will be praised in Japan even more with your prayers and supports.

The fifth delegation (8 members including Rev. Watabe, vice-moderator and Emi Beland, chair of China committee) from Japan visited Shanghai, Chengdu, Langzhong, Chongqing and Beijing in May, 2017 and met with CCC/TSPM as well as brothers and sisters at local churches and theological seminaries. Since NCCJ's last visit, new curriculum was implemented such as piano lessons and Chinazation of theology. Christians (Protestant) now number more than 45 million.

Toilets - Japanese Style Hospitality

When traveling, we often have troubles using toilets different from home. Japanese toilets are well-known for being clean and functional. It has been so for the past 30 years, ever since the shower toilet appeared on TV in 1982. The automatic washing toilet is now widely spread and up to 80% of the Japanese households are equipped with one. New and updated versions have been developed and used in various places, such as airports, department stores and luxury hotels. Please try the various functions if you have a chance to visit Japan.
